## INTRODUCTION

Dear friend,

On behalf of the Spanish Cooperative Group for the Treatment of Digestive Tumors (TTD), we are pleased to invite you to the 28<sup>th</sup> International Symposium of our group, which this year is held virtually on the afternoons of December 15<sup>th</sup>, 16<sup>th</sup> and 17<sup>th</sup>.

This event is an annual conference at international level in the field of digestive tumors, taking place annually for the last 27 consecutive years, and this is now an extraordinary year due to COVID-19 and the crisis which has brought to our respective health systems. But cancer is still there and digestive tumors continue to be a challenge, and progress in their knowledge and management remains an absolute necessity.

In our symposium, as in previous years, we aim to be a meeting and reference point for all oncologists and other specialists involved in the investigation and treatment of digestive tumors. As in previous editions, we will have the attendance of excellent national and international professionals to review and building consensus on our patients care advances.

The developed program contains a table dedicated to gastro-esophageal cancer, another to pancreatic tumors and NET, and another to liver tumors (including liver metastases, hepatocarcinomas, and cholangiocarcinomas). The last three tables will be dedicated to colorectal cancer, a controversy over the role of NGS in metastatic CRC, another table dedicated to prevention, localized disease and the role of liquid biopsy, and the last table dedicated to metastatic CRC.

We are positive that this programme would be of your interest. It will be an honour for us to have your active participation, which will undoubtedly contribute to increasing the educational value of the symposium.
