## INTRODUCTION

Dear friend, on behalf of the Spanish Cooperative Group for the Treatment of Digestive Tumors (TTD), we are pleased to invite you to the 27 International Symposium of our group, which will take place on December 12th and 13th in Malaga.

As in previous years, the objective of the symposium is the presentation and discussion of current issues in digestive cancer as well as the knowledge and research exchange that generates these type of events.

We have developed a program that includes a couple of round tables of controversies on the first day, a table exclusively dedicated to the value of plasma in the CRC and new concepts in molecular biology in hepatocarcinoma and bile duct. The second day is dedicated exclusively to the mCRC on highly topical issues such as immunotherapy, CTC with results of the VISNU study, ctDNA and sequence.

For this, we have an ambitious program full of great experts that will allow to give us an always enriching discussion.

For all this, it will be a pleasure to have your presence and active participation.
